## ORTHOTIC SERVICES

Dacey Ltd is a Welsh company providing orthotic services to both the NHS and the private sector. Established in 1972 we now have a highly experienced team of HPC registered Orthotists.

At our Cardiff and Merthyr facilities we have a suite of well equipped clinic rooms and provide orthotic services throughout Wales and the West of England through a variety of NHS and private clinics.

Our Orthotists are experts in the assessment and fitting of orthoses (supports) to all parts of the body. This includes the provision of many different types of footwear and insoles for a variety of foot conditions and supportive braces for all areas of the body.

We are able to provide a complete orthotic service to those with complex medical conditions including diabetes, rheumatoid/osteo arthritis and stroke rehabilitation. We also provide sports bracing for active individuals who may require additional support to participate in their chosen pastime, such as knee bracing for skiers and motorcross riders.

Working in association with  **Bioness**® we are fortunately one of a selected few distributors in the UK of the Bioness, NESS L300™ Foot Drop System and the NESS H200™ Hand Rehabilitation System for patients who have suffered central nerve damage associated with medical conditions such as stroke, multiple sclerosis, traumatic brain injury, incomplete spinal cord injury and cerebral palsy.

## BESPOKE PRODUCT

Our manufacturing facilities are situated in Cardiff and Merthyr. It is here that all of the bespoke products required to fulfil the NHS contracts and private requirements are fabricated.

Footwear, insoles, all types of plastic, leather and metal orthoses such as calipers are manufactured in Cardiff. Whilst our Merthyr facility specialises in all types of fabric orthoses such as abdominal supports, gaiters and made to measure brassieres.

We also provide an adaptation and repair service to patient's own goods. This includes adding raises and sockets to footwear and the inclusion of mastectomy pockets to brassieres.

Our footwear department is the largest in the factory. Here we manufacture stock, modular and bespoke footwear, which are available in a vast choice of styles, designs and colours, including an extensive range of leisure footwear.

A comprehensive catalogue is available for trade partners by calling the number overleaf or can be accessed online at [www.dacey.co.uk](http://www.dacey.co.uk)

## STOCK PRODUCT

In addition to our bespoke products, Dacey Ltd is also able to supply a comprehensive range of stock or 'off the shelf' bracing products, through our **ORTHOTIX** sports & orthopaedic bracing division.

With the budget restrictions now being imposed on the NHS we identified the need for our own range of competitively priced products. After extensive marketplace consultation, the **BASIX RANGE** was introduced to satisfy this requirement. As well as offering our own branded range, we also exclusively supply products from other premier worldwide manufacturers.

Our dedicated customer response team coupled with our in-house Healthcare Professionals and bespoke manufacturing facility, ensures that the quality of our service and product are second to none. Products may be purchased directly or online through our website [www.orthotix.co.uk](http://www.orthotix.co.uk)

## FOOTWEAR CENTRE

To support the Dacey clinicians and in response to public demand and many requests from local healthcare professionals, we have established specialist footwear centres at our Cardiff and Merthyr premises, which are open to the public. Here we stock a wide selection of 'off the shelf' sports footwear (Cardiff only) and wide fitting comfort footwear from leading suppliers such as Mizuno, Asics, DB, Padders, Cosyfeet and Klaveness.

Our experienced sales team provide an individual fitting service with friendly advice and footwear recommendations to ensure that all customers to our centres find the most suitable footwear for their condition.
